DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 7, 2003 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In claim 14, line 5, it appears that "second" should be replaced by--third--, and in line 9, "third" should be replaced by--third--; unless another step is intended.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2823

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tada (5,545,577) in combination with Contiero et al. (5,041,895).

Tada teaches a method of forming an integrated circuit having a second conductivity type low-voltage transistor 102 in a first region, high-voltage transistors 103, 104 in a second region and a first conductivity type low-voltage transistor 103 in a third region (Fig. 1) which includes doping the first and second regions with a first dopant concentration (Col. 6, lines 3-10, and Fig. 2(a)), and then doping the third region with a second dopant concentration (Col. 6, lines 11-16, and Fig. 2(b)) wherein an additional voltage threshold adjust implant step to adjust the threshold voltages of the first and second low-voltage transistors is not performed (Figs. 3(a)-3(d)).

Tada does not disclose forming a first conductivity type high-voltage transistor.

Art Unit: 2823

Contiero et al. discloses forming integrated circuits which includes forming n-channel and p-channel LDMOS transistors in a high-voltage region, and forming p-channel and n-channel MOS transistors in a low-voltage region (Fig. 1).

It would have been within the scope to one ordinary skill in the art to combine the teachings of Tada with Contiero et al. because it would enable formation of high-voltage transistor 103 of Tada to be performed.

In regard to claim 12, the step recited in lines 6-7 would be obtained as the same materials are being treated the same as the instant invention.

In regard to claim 14, the step recited in lines 13-14 would be obtained as the same materials are being treated the same as the instant invention.

Allowable Subject Matter

8. Claims 10 and 16 are allowed.
